

Frank Rewold and Son, Inc.

Frank Rewold started his construction company in 1918 building barns in the Rochester area. Mr. Rewold's first "official" office was on the grounds of the Matilda (Alfred) Wilson estate in an area that is now Oakland University. He subsequently built many of the outbuildings on her estate.

Today the company has grown from a family oriented general construction company to a professional corporation.

Frank Rewold has built his reputation on integrity, sincerity and an unwavering commitment to his clients. Virtually 90% of his work is referral based.
